Saulzais Berry

Raw milk sheep's cheese from the Loire region. Rich and full of flavour when ripe. Farm-made.

Alex

Alex is a semi-hard cheese, coming from the Allgäu region in Southern Germany. It's a typical mountain cheese, that is full in flavour and has matured for nine months. The rind is covered in a mixture of ash and elderflower syrup. When the cheese refiner made his very first cheese, he didn't have a name for it while travelling to the shop in Munich to present it there. Therefore he named it after the train he was on: the Allgäu Express, or Alex in short.

Le Petit Diable

Le Petit Diable is a creation of the master refiners Van Tricht themselves. This lovely cheese is made from pasteurized cow's milk, coming from the North of France. Cows graze near the coast and thus eat their grass pre-salé. This gives a specific taste to their milk. During the production process a strong blond beer of high fermentation is added to this cheese. Afterwards the rind is also washed multiple times with the same beer. A coat of breadcrumbs holds on to the beer aromas.

La Mère Michel

The cheese is made by La Fromagerie du Gros Chene in Huy in the province of Namur. The crust is washed with red grease and this gives it its somewhat spicier taste. Raw cow's milk.

Tomette chèvre cendré

Ash-coated goat cheese from a double pressing, meaning the curd leaks out twice. The first time the cheese leaks into a muslin cloth in a provisional mold, the second time into its final mold where it is lightly pressed. This creates a slightly firmer dairy, yet it still melts creamily in the mouth. The cheese is made from raw milk by the Bajocasse farm in Nonant in Lower Normandy.

Comté Marcel Petite Fort Saint Antoine Réserve

Renowned hard cheese from the Jura, made from raw cow's milk. This cheese has matured in an old military fort at about 1100 meter altitude, where temperature as well as humidity are constant. The perfect environment to ripen your cheese. The natural flora in this fort brings a rather unique taste to their cheeses. The curiosity of this Réserve is that refiners Van Tricht selected the wheels upon their taste and made them put aside in the fort, after which they are brought to the maturing room in the city brewery to proceed their ripening process.

Shropshire Blue

This high-class cheese from cow's milk is made in the United Kingdom and is related to the Stilton cheese. This one was first produced in 1970 at the milk factory Castle Stuart in Inverness in Scotland, by Andy Williamson, a cheese maker who was trained in the production of Stilton in Nottinghamshire in the UK. Therefore this cheese was first known by the name 'Inverness-shire Blue' or 'Blue Stuart', but later rebaptized to Shropshire Blue to draw more attention to it. So for the record: it has nothing to do with the place called 'Shropshire'.

Nowadays, it is produced in cheese factories in Clawson, Leicestershire, Cropwell Bishop and Colston Bassett, where they also make Stilton. This blue cheese gets its orange colour by the addition of annatto, some natural food coloring. Shropshire is softer than Stilton but equally creamy in texture. Aside from the spiciness coming from the blue marbles, you'll also get a sense of caramel flavour.

Old Groendal

Belgian cheese made from pasteurized cow's milk. This 'old' crumbly cheese, sometimes referred to as 'the Parmesan cheese of Belgium', has aged for 18 months.

Maker's Mark 46

French oaked for layers of flavor. Creating signature bourbon requires first-of-its-kind finishing that begins with fully matured cask strength Maker's Mark. Ten seared French oak staves are fitted into the barrel before the whisky is finished to maturity under ideal conditions in their limestone cellar. The result is an easy-to-sip bourbon with notes of caramel, vanilla and baking spice that greet the palate in layers.
